

C1-001 to Palestine : Towards the End of Occupation

Reason

In order to make a better and more complete text, we propose to add some things to it:

- to give more precise information about settlements. Maybe include a clear wording in par. 65 that ALL settlements are illegal and no solution that includes a compromise on that is acceptable. The 1967 Green Line is the only valid international border between Palestine and Israel.
- mention forcible transfer of population : against international humanitarian law
- Support of prisoners in hunger strike: over 1000 Palestinians in Israeli jails. They have been in strike for 31 days (and counting)
- Tel Aviv is the only capital of Israel. The EU must not accept official invitations to the new US Embassy in Jerusalem when they move it.
