Finnish Young Greens

Political Platform text

From line 148 to 152:

The use of GMOs in agriculture is ~~sometimes portrayed as~~ a viable solution to some of the challenges faced by our food system, by providing better yields ~~or~~ and contributing to adaptation to climate change. ~~We consider~~ However, the use of GMOs* ~~to have~~ has many ~~disadvantages, including~~ potential risks, such as increasing corporate control over the food system and the dependence of farmers on biotech companies, threats to

From line 154 to 159:

developed to be resistant to chemical herbicides and their use therefore results in an increase in pesticide consumption. ~~We also believe that~~ The use of GMOs should not pose a threat to other solutions to the challenges ~~faced by~~ our food system ~~are better solved with~~ faces, such as heirloom seeds and the development of agroecology. ~~This is not compatible with the large-scale development of GMOs in agriculture.~~ We therefore support strong regulations ~~that ensure a ban~~ on the cultivation of ~~or~~ and import of GMOs into the EU, ~~including new GMOs~~ to ensure their use is responsible and sustainable.
