Political Platform text

From line 148 to 152:

~~The use of GMOs~~ While GMOs* in agriculture ~~is sometimes portrayed~~ are seen by some as a solution to some of the challenges faced by our food system, by providing better yields or contributing to adaptation to climate change. ~~We consider the~~ their use ~~of GMOs* to have~~ still has many disadvantages, including increasing corporate control over the food system and the dependence of farmers on biotech companies, threats to

From line 157 to 159:

development of agroecology. This is not compatible with the large-scale development of GMOs in agriculture. We therefore support ~~regulations that ensure a ban on~~ regulatory mechanisms which put the ~~cultivation of or import of GMOs into~~ farmers forward and break the ~~EU, including new GMOs~~ corporate control over an essential public good as food. Farmers are sovereign and thus have the last word. Money should never be placed above food and people!
