R12 A1: End the Fossil Fuel Economy. Now.

Proposers Jong Groen

Motion text

From line 29 to 31:

- to ~~immediately stop~~accelerate the phaseout of all fossil fuel subsidies and redirect such subsidies into renewable energy projects
- to ~~immediately stop~~accelerate the phaseout on the import of oil and gas, especially coming from dictatorships and LNG production

Delete from line 37 to 38:

- ~~to redirect all current fossil fuel subsidies into renewable energy projects~~

Reason

With the current concerns on security of energy supply, we need to carry on with the energy transition very carefully. Should we immediately stop all fossil fuel energy projects, knowing our energy mix is not yet ready to cover the energy gap, we are looking at a massive energy shortage leading to, among others, energy poverty and less space for governments to carry on with the ecological, climate, and energy transition.
We want to link the phaseout of fossil fuel subsidies to its redirection to renewable energy projects to make a more coherent point.
