Political Platform text

Insert from line 742 to 744:

not endanger climate objectives and if fossil fuels are no longer used for electricity production on the same network. FYEG strongly condemns the output from nuclear power plants being replaced by fossil gas power plants, thus increasing dependance on fossil fuels from Russia and other authoritarian states. European countries should not export their nuclear technology or build nuclear plants outside of Europe.

Reason

Again quite self-explanatory. Protests strongly disagrees with the increasing dependence on Russian energy exports, which is mainly caused by the closure of nuclear power plants.
