Title: **PP1 AA2: Political Platform**

Political Platform text

Insert from line 742 to 744:

not endanger climate objectives and if fossil fuels are no longer used for electricity production on the same network. Thus, FYEG strongly supports the development of renewable solutions to replace the output from nuclear power plants. This helps to limit dependance on fossil fuels from Russia and other authoritarian states. European countries should not export their nuclear technology or build nuclear plants outside of Europe.

Reason

(Alternative Amendement) The French Young Greens believe that the previous amendement (A2), with its negative formulation simply condemning the replacement of nuclear energy by fossil fuel energy, was to passive regarding nuclear energy and the energetic transition. Thus, we instead propose a positive formulation, to support the replacement with renewables, instead of condemning the replacement with fossil fuel. Thus, the amendement is much more pro-active, calling for change instead of favoring the status-quo of a non-renawable energetic mix.
