R1 A2: Green Space Policy

Proposers Protests

Motion text

Insert after line 65:

Corporations should be accountable for the space pollution they are making, as well be accountable for the destruction of space discovery potential, especially with global systems like Starlink. Therefore, we demand that every global scale project is implemented in collaboration with scientists not to reduce the scientific potential in space discovery.

Reason

Many organizations and scientists have claimed issues with starlink, e.g., here is the NASA warning: https://interestingengineering.com/nasa-starlink-warning
