R4 A4: Indigenous rights are human rights!

Proposers DWARS, GroenLinkse Jongeren

Motion text

Insert from line 28 to 29:

- Funding projects by the state or civil society organisations that increase the knowledge of- and usage of indigenous languages. This includes the teaching of indigenous languages as part of school curricula in regions with indigenous communities

Reason

The amendment:

1. Clarifies funding of projects to include state initiative.
2. Emphasises the inclusion of indigenous languages as part of school curricula.

Why:

1. Funding should go to public or private initiatives that foster the use of indigenous languages. The facilitation of language use can especially be fostered by the state.
2. The discussion states it is the responsibility of governments to teach indigenous languages in schools - this should be reiterated here.
