R15 A2: The Manifesto of the Generation in Crisis

Proposers Jong Groen

Motion text

Delete from line 120 to 122:

- We propose a one-time COVID relief to all European young people (age 14 - 30)~~,~~ ~~worth 2000 EUR,~~ to help them overcome the challenges they currently face, due to the sacrifices they had to make in the past years.

Reason

We believe that EU domestic aid or relief should not be bound to a specific amount. We need to realise that a certain amount of money can be valued differently in each Member State. We also need to consider the effect of such measure to the rise of inflation rates, which in turn will have an adverse effect on us (e.g. USA).
