#### **From line 60 to 64:**

These are everything from dust to pens and broken satellites that are as big as buses. ~~Which usually moves at about 27,000 km/h.~~ In the worst case, it could be that in the future we will not be able to postpone things into space because there is too much rubbish in the way - the so-called ~~Keppler~~Kessler syndrome. Already today you need to plan launches for clusters of space debris. That is why we

### **Reason**

Speed is depending on the attitude and the speed is irrelevant in this sentence.  
Also it is the Kessler syndrome
