

R11 A3: 2% of GDP towards climate solutions

Proposers

Greens of England & Wales

Motion text

Insert from line 6 to 11:

in the climate crisis. As long as GDP is the main indicator for the financial situation of a country, European governments should incorporate a minimum 2% of their GDP towards a just transition in their (annual) budgeting.

Translating the 1.5°C goal agreed on in the international Paris Agreement into a national commitment of a minimum 2% of GDP towards climate solutions, makes the fight for 1.5°C more tangible. This clear and reasonable demand allows young green

Insert from line 31 to 33:

Energy should be generated from renewable sources. Investments in wind and solar energy would be part of the minimum 2% GDP towards climate solutions package. Although nuclear energy emits less carbon emissions, they cannot be included in this

Insert from line 41 to 43:

Investments in research & development on hydrogen are eligible, yet should not be the core objective of the minimum 2% of GDP towards climate solutions. In this investment package, the focus stays on the funding of an urgent just transition,

From line 50 to 52:

generate economic & societal gain. This resolution focuses on 'national governments', but ~~2%~~a minimum 2% of of budgeting towards climate solutions should be the goal of every

government & could also be a goal for budgets of non-state actors

Reason

calling for more - at least 2%
