Political Platform text

Insert from line 954 to 955:

animals are not housed or treated in a manner in keeping with international best practice. **We support the requirement of continuous training throughout researchers' careers, of a well-balanced project evaluation committee including people with the relevant scientific background on non-animal methods and the 3Rs, as well as by people linked with animal protection or advocacy.**

Reason

We believe it is essential to support animal protection, well-being and working conditions for researchers to develop or support continuous training of researchers on those topics. Experts on non-animal methods in evaluation committees would be keen to involve actors with the relevant background and guarantee the fullest application of the principle of reduction, refinement and replacement.
