R2 A1: Younger institutions for a greener future

Proposers FYEG Executive Committee

Motion text

From line 60 to 61:

- ~~On the European Union to create a directive for vote at 16 at least in the European elections.~~
- **For the voting age to be lowered to 16 for all elections, including for the European Parliament elections.**

Delete from line 70 to 71:

- FYEG can push green parties to have this mandatory percentage so they are really progressive.[Space]

Reason

Legally, the EU does not have the competence to create such a directive, therefore we suggest a different phrasing.
