Insert from line 56 to 57:

US for military support. Therefore, FYEG supports better military cooperation amongst EU member states and with neighbouring countries.

FYEG further calls on European Governments to immediately end the funding of the Russian state through the purchasing of Liquefied Natural Gas (LNG) which amounts to €10bn since 2022; and end at once the transportation of such cargo through European waters.

Reason

The sale of LNG by European states has contributed €10bn to Putin's war machine since 2022, despite most other forms of trade with Russia ceasing. Not only is the burning of LNG dangerous for our planet, but European states should not be indirectly funding the invasion of Ukraine in this way.
