I1 A2	Executive Committ	<p>From line 556 to 558:</p> <p>FYEG's representative is elected at the General Assembly. They must not be older than 35³² years old at the year of election. They are required to attend at least one live Executive Committee meeting every year. Moreover they must submit a</p>	As this is a three year long mandate, we are setting the age limit at the same level as the age limit to become a member of the FYEG Executive Committee.
I1 A3	Executive Committ	<p>In line 1024:</p> <p>Each resolution should be supported by at least one^{three} Member Organisations</p>	With this amendment, we are aiming to encourage member organizations to work together and to increase the diversity of perspectives represented at the initial resolution drafting process before it is discussed at the General Assembly. We are already seeing positive tendencies in member organization collaboration to write resolutions, and we want to further support that being the norm rather than the exception.
I1 A4	Executive Committ	<p>Insert in line 159:</p> <p>General Assembly is presided in line with the Meeting Rules (Annex - 1). <u>The Executive Committee can propose additions for the Meeting Rules no later than a week before the General Assembly. These additions must be sent to all member organizations, and they must be approved at the start of the General Assembly by a simple majority and they lose power once the General Assembly is concluded.</u></p>	Since the Meeting Rules are set in the IRPs, we have had many extraordinary examples of precedents present at our General Assemblies, to name a few - who is allowed in the pre-voting discussion, how does the speaking list work, etc. With this amendment, we are aiming to resolve some precedents for the upcoming General Assembly without changing the IRPs every year to address them. These additions could be prepared in collaboration with the proposed presidency. The EC wants to stress that, if adopted, these changes will take effect starting the next General Assembly, and only then the Executive Committee may propose these additions to the Meeting Rules.
I1 A5	Executive Committ	<p>From line 863 to 869:</p> <p>One nomination or support letter from the Member Organisation they belong to that proposed the candidacy. If that is not possible the Member Organisation, of which the candidate is from, must^{cannot} provide an explanation for the rejection of a nomination and^{or support letter}. the possible candidate has the right to provide a letter of justification. The letter will be shared with the delegates of the General Assembly. The General Assembly will decide, through a vote by two-thirds majority, whether this person is admitted as a candidate or not.</p>	At the last General Assembly, we had candidates whose candidacies were supported by their member organization, but they could not be explicitly endorsed for various reasons, e. g., the candidate being over the age limit to be in the organization. Although the member organization did not oppose them running as their candidates, the current process led to additional votes that were not necessarily needed, thus taking away time from the General Assembly. The two-thirds majority vote remains only in case the Member Organization wants to explicitly block a candidate from running.
I1 A6	Executive Committ	<p>Delete in line 219:</p> <p>1 week before the General Assembly is the deadline for:</p>	The Executive Committee proposes to move the amendment deadline a week earlier, as the current process leads to the presidency not having enough time to prepare for the online CAS, as well as forcing online CAS to happen during days when people traveling by land could already be traveling to the location of our General Assembly.

I1 A7	Executive Committ	<p>From line 400 to 403:</p> <p>If the tie occurs between two candidates in an election, and only one may be elected, a vote shall be held to decide between them. If the result is once again a tie, the body voting may choose to vote once more or decide by some form of chance. At any point during this, either candidate may choose to withdraw.</p> <p><u>During the vote calculation process, systems such as Scottish STV calculate how to break ties in elections using the preferences set out in earlier rounds of voting. If this still creates a tie or there is insufficient data to do the calculations, the candidate who wins in that round is chosen at random. If it is determined by the Presidency that the final winners of an election varies according to random chance then:</u></p> <p><u>Between the candidates involved in the tie, the candidate with the most first preferences takes the position. If the candidates are tied in first preferences, then second preferences are counted. This process is continued until all preferences are exhausted.</u></p> <p><u>If a result still cannot be determined due to a tie, the Presidency may opt to delay the final decision and schedule a further head-to-head vote between the tied candidates. This vote may take place after the conclusion of the General Assembly, in which case responsibility for organising and conducting the election will pass to the Executive Committee. Additional head-to-head votes may be held as necessary until the tie is resolved.</u></p>	<p>At the last GA in Dublin, we had a precedent where our current wording for tie-breakers did not give a clear direction on what steps the presidency must take to resolve a tie-break. In collaboration with the previous and proposed presidencies, the EC proposes this process to resolve tie-breakers for the future. As we are likely having competitive elections in the GA in Paris, the EC has also proposed a statutory resolution, which would apply these rules to elections happening in this GA in Paris. Statutory resolutions have already been done in the past, with the latest case being at the GA in Barcelona.</p>

That is why we present to include a nomination letter from their MO in the procedure.</p>

Additionally, the Executive Committee will implement measures to support such notions throughout the General Assembly.</u><u>The General Assemby</u>will be followed by the annual public conference that gathers experts,</p>	<p>As the Federation of Young European Greens (FYEG), we stand for a united, fair, and inclusive Europe. As Green youth, we envision a Europe where everyone is empowered to take part in shaping society, and where all voices—especially those historically marginalised—are heard in the decision-making process. We envision a Europe where care is at the centre of our societies, economies, and politics. We foster this vision by engaging in dialogue about the issues that matter to us, even when those conversations are difficult or uncomfortable. These moments of reflection and disagreement are not weaknesses, but strengths. They make us more resilient, more united, and more capable of building a green, caring, and youth-led future.</p> <p>To truly embody the values we promote, we must also hold ourselves to the same values we expect of the world around us. A truly caring and inclusive Europe starts with us. This means not only reflecting on <i>what</i> we stand for, but <i>how</i> we communicate, organise, and relate to one another within our movement.</p> <p>As FYEG, we believe that creating inclusive spaces means making room for all forms of communication—especially those that prioritise care and collective growth. While as FYEG we already have procedures in place to ensure that all voices are equal, and that we pursue safe(r) spaces, we must recognise how certain hierarchies and forms of adversarial or competitive politics are easy to internalise from the context around us.</p> <p>The world around us is not centred around care and vulnerability, and European politics tends to listen to the loudest voice in the room. This should not bring shame, but rather a sense of responsibility to reflect, and an opportunity to learn. Practicing inclusive politics means recognising that strength lies not in overpowering others, but in working together, lifting each other up, and acknowledging the diverse ways in which leadership and participation can manifest. This means cultivating a culture of mutual respect, vulnerability, and shared purpose. Our activism should not be about proving who is right—it should be about building a future where everyone feels seen, heard, and empowered to act.</p> <p>The General Assembly's (GA's) are the place where dialogue between Member Organisations (MO's) is facilitated and where the highest decision-making body of FYEG shapes the organisation. We want more opportunities to discuss what inclusive and caring politics means to us, as young greens. More places where we can hold open and truthful discussions with each other and within ourselves are needed. As MO's we find it incredibly important that those spaces are inclusive, open and caring for all voices, especially during hard and difficult conversations. Only by aligning our internal practices with our external goals can we truly lead by example—and build the kind of Europe we want to live in.</p>

This will also ensure that new Member Organisation and delegates can benefit from an official introduction to the contemporary discussions within the Federation.</u></p>	<p>We believe this will bring more equality among the different delegates for the incoming GA, ensuring that they are provided in a formal manner with the recent debates and agreements found at previous FYEG GAs. We think this will help all delegates think of GAs in a more long-term manner, and benefit to new MOs or MOs who are becoming active again after a hiatus to gain the ""historical"" knowledge on FYEG. We also trust that this will provide a space that is less rushed than the GA to mention diverse topics of debates and go deeper in the arguments and so on.</p>

This is also a chance for MOs and MOs representents who don't yet have a large network within FYEG to discover different MOs position, to make their own heard, and give more time for opinions to be formed or changed.</p>

It is very important to understand why this is recognized as a genocide. Just as the international community failed to protect the victims of genocide during the Holocaust, in Bosnia, and in Rwanda, we are now failing the Palestinians in the same way."</u></p>	We felt this text better represent where young greens are in Europe and as the whole reason for this resolution to update and build up on the last year's resolution.

R1 A3	Genç Yeşiller	<p>Insert after line 74:</p> <p><u>Suspension and eventual expulsion of Israel's UN membership for persistently violating the principles of the United Nations Charter.</u></p>	Israel is already banning a UN agency (UNWRA) and persistently attacking UN member states, destroying UN facilities, killing UN employees. This is also in line with our previous resolutions (2022 and 2023) that call for the expulsion of the Russian Federation from the UN and the UNSC.
R1 A4	Genç Yeşiller	<p>Insert after line 74:</p> <p><u>Designating Israel as an apartheid state on the United Nations General Assembly</u></p>	Multiple UN resolutions and special rapporteurs demonstrate Israel's apartheid practices alongside with many international human rights organisations such as Amnesty, Human Rights Watch and B'tselem.
R1 A5	Genç Yeşiller	<p>Insert after line 74:</p> <p><u>Implement arms and energy embargo on Israel</u></p>	<p>Under international law states have a duty to prevent genocide which includes not to be complicit in genocide by selling weapons. ICJ Bosnia Genocide case and recently South Africa vs Israel case underlines this duty.</p> <p>Israel's genocide is powered by oil and coal, which fuel its electricity grid, its arms industry, its AI infrastructure and its military vehicles. Even the hypothetical future member organisations of our federation who would support a genocide and apartheid should support an energy embargo since you can't ignore the emissions and the realities of climate crisis in their part of the world.</p> <p>This is particularly important to us since the Turkish State boasts themselves on the international stage on their support of Palestine while continuing to provide a significant part of Israel's energy.</p>
R1 A6	Genç Yeşiller	<p>Insert after line 74:</p> <p><u>Condemn the ongoing genocide and ethnic cleansing in the Occupied Palestinian Territories</u></p>	Last paragraph of the resolution explains the reasoning quite well. It is well past the time for our federation and the green family as a whole to stand up for our principles and unequivocally label these actions for what they are.

Senior members of the government, including the Israeli finance minister Bezalel Smotrich, have threatened to destroy Gaza entirely in a scorched earth tactic and to implement forced deportations of Palestinians living in Gaza. Statements such as these by senior Israeli ministers, echoed by the entire cabinet, show the Israeli government's intent to commit a crime against humanity, as defined in the Rome Statute. The Israeli government has proven repeatedly that it does not respect international law and is directly complicit in war crimes against Palestinians. The Israeli government keeps maintaining the lie that it is acting to save hostages, while the families of hostages denounce the proposed further escalation of the invasion of Gaza. R1 A83	DWARS	<p>Insert from line 70 to 71:</p> <p><u>Ending Israel's assault on Gaza is only the first step. We must address the root causes of this conflict and genocide: settler colonialism, ethnic cleansing, and global complicity. Palestinians are not victims of a natural disaster. They are being deliberately targeted by a state that enjoys international impunity.</u></p>	We can't just simply 'solve' the current violence and then expect that it won't happen again or that all will be well. Israel's assault is rooted in decades of violence and injustice and is the result of a colonial mindset from them and us. We must acknowledge that.
R1 A84	DWARS	<p>Insert from line 70 to 71:</p> <p><u>We therefore reject any narrative that frames this genocide as a symmetrical conflict. It is the brutal oppression of a colonized people by a militarized and internationally backed occupying power. The ongoing genocide and occupation cannot be resolved by merely ending overt acts of violence—whether bombings, starvation, or obstruction of aid. A meaningful resolution must address the structural imbalance between Israel as the colonizing power and Palestine as the colonized population.</u></p>	Israel and Palestine are not two equal sides in this 'conflict'. The one is a nuclear power while the other is occupied by it. Going about resolving this, without acknowledging this power unbalance, will always fail.
R1 A85	DWARS	<p>Insert from line 70 to 71:</p> <p><u>A truly just and sustainable peace can not be built on colonial foundations. The so-called "two-state solution" has been used as a rhetorical shield by the international community while Israel entrenches control through settlements, apartheid, and military occupation. It is no longer viable — if it ever was — as it simply reinforces colonial logic that privileges state sovereignty over people's lived realities.</u></p>	<p>The two-state solution as it currently exists stems from UN Resolution 181 and the Oslo Accords.[1] As such, it is a product of a colonial history. The result is an apartheid regime, in which Palestinians are systematically oppressed and are now being eradicated. As of May 2023, there are 5.9 million Palestinians registered as refugees. As long as the occupation of Palestinian territory by Israel continues, Palestinians cannot return to their own land. The current two-state solution is a construct that is mainly popular among Western states. The current situation shows that a two-state solution with a separate Israeli state leads to the occupation of Palestinian territory. [2][3]</p> <p>[1] https://www.britannica.com/topic/two-state-solution</p> <p>[2] https://news.un.org/en/story/2023/05/1136662</p> <p>[3] https://www.un.org/unispa/about-the-nakba/</p>

The Israeli government has enshrined Jewish supremacy in its legal frameworks, consolidating an system of apartheid as documented by Amnesty, B'Tselem, and Human Rights Watch.</u></p>	<p>As mentioned in last year's resolution Israel has violated Article 3 of the International Convention on the Elimination of All Forms of Racial Discrimination (CERD). This article states that: "States Parties particularly condemn racial segregation and apartheid and undertake to prevent, prohibit and eradicate all practices of this nature in territories under their jurisdiction" (p. 64)[1] The International Court of Justice observed in its 2024 Advisory Opinion "that Israel's legislation and measures impose and serve to maintain a near-complete separation in the West Bank and East Jerusalem between the settler and Palestinian communities" (p. 65)[1].</p> <p>In Amnesty's report on Israel's apartheid against Palestinians (2022)[2] they conclude that Israel has established and maintained a system of apartheid (p. 266). This resolution was used as the basis for the updated unified position of the European Green Party in their congress in December 2024. The alignment of the Greens with international law, human rights and self-determination is common across the continent, and the acknowledgement of the differences of the members of our political family does not prevent us from a common understanding of what the role of the EU, European states and the international community must be to withdraw from active support of destruction and become a reliable ally for establishing justice and peace in the Middle East. With this text, we build on last year's resolution to construct a common Young Green understanding of our vision for the future of peace and prosperity for the Palestinian and Israeli peoples in their self-determination. While this was a good step, the current crisis demands a stronger, more focused stance. The European Union (EU), its member states, and other Western countries have a historical responsibility to do everything in their power to stop the ongoing violence, while also acknowledging the role we have played in shaping the present. We express our deepest condemnation of the ongoing genocide in Palestine, especially in the Gaza Strip, and the broader humanitarian and political catastrophe. As FYEG, an organisation committed to climate justice, decoloniality, feminism, non-violence, anti-racism and anti-fascism, we cannot remain silent in the face of such clear and devastating injustice. The access can also be given to privately owned territory only under following circumstances: if lands are privately owned and or used for animals, like farmland, these animals have to be treated respectfully, especially by tourists. It should not become the farmers obligation to warn tourists and or locals that (most) animals don't want to be approached and or that their territory is in difficult terrain, therefore farmers shouldn't be liable or responsible for people's behaviour, actions and or accidents. This requires every person to do an appropriate amount of research before camping and or accessing privately owned land, to ensure the understanding of the the terretory, of the animals who live there, which cultural customs exist and how they are performed to be sure to respect the owner of the land (for example farmers), legal and social norms and which difficulties or conditions the terrains have and weather influences they are under.</u></p> <p><u>These guidlelines come with the understanding that different regions have different cultures and rules, but the most important rule being that all animals have to be respected. It is important to note that from what is known about this deal, it is not clear on what guarantees are offered to Ukraine and there is instead a reliance on the good will of the executive branch of the United States government. Specific consideration is needed when mining of raw minerals is planned in biodiversity rich, water rich agricultural areas, being that it leads to a) ecocide (extintion of existing classes of flora and fauna, deforestation), b) forced displacement of local communities, and c) loss of jobs of those who's primary income comes from agricultural work (Đorđević et al, 2024).</u></p>		It is our stance, that mining in agricultural areas should be adressed properly, given the extent of ecocide effects it has on the flora, fauna, humans inhabiting these areas, the water and forest rich environments devastation, since such areas are usually water and forest rich.
