Motion text

From line 14 to 18:

~~As the IDF's devastating targeted murder of Palestinians continues, which the overwhelming majority of our member organisations consider to be an ongoing genocide, while others consider that this statement needs to be ruled by an international court, we stress our strong condemnation of the horrendous war crimes mentioned in this and the previous resolution.~~

As the IDF’s devastating and targeted killing of Palestinians continues, we felt compelled to change our stance as a federation to truly reflect the severity of the acts committed by Israel and the United States. These acts have been characterized as genocide by UN Special Rapporteur Francesca Albanese, who stated:

“Palestinians have experienced war crimes all their lives, but this is different. It is very important to understand why this is recognized as a genocide. Just as the international community failed to protect the victims of genocide during the Holocaust, in Bosnia, and in Rwanda, we are now failing the Palestinians in the same way.”

Reason

We felt this text better represent where young greens are in Europe and as the whole reason for this resolution to update and build up on the last year's resolution.
