R1 A5: Resolution for a just and permanent ceasefire in Gaza and lasting peace in the Middle East

Proposers Genç Ye?iller

Motion text

Insert after line 74:

- Implement arms and energy embargo on Israel

Reason

Under international law states have a duty to prevent genocide which includes not to be complicit in genocide by selling weapons. ICJ Bosnia Genocide case and recently South Africa vs Israel case underlines this duty.

Israel’s genocide is powered by oil and coal, which fuel its electricity grid, its arms industry, its AI infrastructure and its military vehicles. Even the hypothetical future member organisations of our federation who would support a genocide and apartheid should support an energy ambargo since you can't ignore the emissions and the realities of climate crisis in their part of the world.

This is particularly important to us since Turkish State boast themselves on international stage on their support of Palestine while continuing providing significant part of Israel's energy.
