R3 A10: Updated Young Green vision on European defense policy

Proposers Zelena omladina Srbije

Motion text

From line 134 to 137:

- is necessary to focus on our strategic autonomy. The main points to address are achieving energy self-sufficiency by eliminating dependence on ~~Russian and American~~ fossil fuels, most importantly those imported from imperial powers through the deployment of renewables; having the capacity to supply critical rare earth elements essential for

Reason

This change addresses the questionable ethics of other states which export fossil fuels. Russia and America are the biggest, but getting fossil fuels for example from Iran does not seem like an improvement.
