**R3 A12: Updated Young Green vision on European defense policy**

**Proposers** Genç Ye?iller

**Motion text**

**Insert from line 123 to 124:**

- Ensure European military independence from the increasingly hostile partnership with the USA and NATO by creating a security framework consists of EEA, EU and it's candidate states.

**Reason**

We believe both within this bullet point and the whole message of the text are more in line without NATO involved. If we are trying to rethink the European security as a whole while avoiding the pitfalls and sticking to our principles mentioned in the rest of the resolution, the best way forward would be a unified Europe without USA.
Only time the article 5 has been used was the brutal invasion of Afghanistan in 2001 which led to invasion of Iraq in 2003 and so forth just to satisfy the neocolonial bloodthirst of USA despite the massive antiwar protests in all over the world.
