I1 AM1: Internal Rules of Procedure

Proposers Executive Committee

Motion text

Insert from line 106 to 107:

or suspend the membership of the organisation to give sufficient time to the Executive Committee to look into the situation.

1.1.12. Membership Continuity in Cases of Merger, Dissolution, or Transformation

Where a FYEG member organisation undergoes a merger, dissolution, or structural transformation involving an organisation affiliated with another European political youth federation, the FYEG General Assembly or, between GAs, the EC acting by qualified majority, may proactively confirm or adapt that organisation's membership status prior to the external process being finalised. Such a decision shall take effect immediately and shall be binding for all parties regardless of subsequent decisions made by third-party organisations.

A decision taken under this article shall be understood as a confirmation of continuity of membership and not as the granting of new membership. It shall have retroactive effect from the moment the structural change process commenced, ensuring no interruption of membership status is recognised.

Reason

This amendment ensures that FYEG can proactively protect the continuity of its member organisations during mergers, dissolutions, or any kind of structural transformations in an increasingly volatile European political landscape. As progressive and green forces across Europe increasingly cooperate to counter the rise of the far right, party mergers and political realignments may create uncertainty regarding youth organisations' international affiliations. FYEG must retain the autonomy to safeguard its federation from external interference and ensure that member organisations committed to our values do not lose their status due to decisions made outside our structures. By allowing the General Assembly and

Executive Committee to act swiftly and confirm continuity of membership, this amendment strengthens our organisational stability, political independence, and democratic control within FYEG.
