R4 AM10: Protecting International Law Against Empires: to Infinity and Beyond

Proposers Young Greens South Tyrol

Motion text

From line 76 to 77:

- The EU ~~end all~~must try to enforce the international legal framework through economic and political ~~relations with states~~measures that ensure the upholding of human rights. European countries should not be economically dependent on countries that violate human rights. We call on the EU to completely repeal the EU-Israel

Reason

It's not realistic to cut all economic and political relations with countries that violate international law. A total cut in diplomatic relations does not lead to more respect for international law, in contrary. Our proposed phrasing makes clear, that European countries should use economic and political measures to enforce the international legal framework. In addition, we want, that European countries are not (economically) dependent on countries breaching international law.
