R4 AM19: Protecting International Law Against Empires: to Infinity and Beyond

Proposers Executive Committee

Motion text

In line 89:

- ~~Strategic autonomy, we shouldn‘t rely on weaponry and external forces~~
- European strategic autonomy must be based on diplomacy, democratic resilience, renewable energy sovereignty, public infrastructure, and reduced military dependency on global superpowers

Reason

This amendment gives a clearer and broader understanding of strategic autonomy. It shifts the focus away from military reliance alone and highlights diplomacy, democracy, renewable energy, and public infrastructure as the foundation for genuine independence.
