R4 AM25: Protecting International Law Against Empires: to Infinity and Beyond

Proposers Executive Committee

Motion text

From line 129 to 131:

- ~~Promote resource sovereignty – Advocate for transparency standards for multi-national corporations to ensure extraction of raw materials provides fair compensation and investment to the host community.~~
- Promote resource sovereignty – Support democratic resource sovereignty by ensuring local communities, workers, and Indigenous peoples have decision-making power over resource extraction projects and receive fair social, environmental, and economic compensation.

Reason

This amendment strengthens the proposal by going beyond transparency and focusing on real democratic control over resource extraction. It makes clear that local communities, workers, and Indigenous peoples should have a direct say, while also ensuring fair compensation for the social, environmental, and economic impacts.
