R4 AM27: Protecting International Law Against Empires: to Infinity and Beyond

Proposers Executive Committee

Motion text

Insert after line 125:

- Advocate for enforceable international mechanisms for climate reparations and loss-and-damage financing funded primarily by historically high-emitting and wealthy states.

Reason

This amendment strengthens the text by adding clear responsibility for climate justice. It makes clear that historically high-emitting and wealthy states should fund climate reparations and loss-and-damage support.
